Online Dealer Shop (ODS) – Online Earnings

An Online Dealer Shop is a dealer sales tool made available at the Human Nature website that provides a personal online store for a Human Nature Dealer, with the dealer's own URL. This provides an online platform for dealers to sell to more customers without the geographical and logistical limitations of selling face to face.

Each ODS is a replica of Human Nature's official online shop (www.humanheartnature.com/buy), with your photo at the top left area of the page underneath the Human Nature logo.

Each ODS can be visited via the dealer's unique web link (e.g. www.humanheartnature.com/buy/lisadelacruz).

NOTE: Use of the brand name and logo. "Gandang Kalikasan", "Human Heart Nature", "Human Nature", its logo and variations of the corporate/brand name or logo are restricted in the Online Dealer Shop name, URL (link), description, profile image and social media thumbnail. Please refer to our ODS FAQ's online for full details: <https://humanheartnature.com/buy/starting-out#ods>

Dealers can share the link to their shop to their friends and contacts via email, SMS and social media, as well as link it to your existing online stores. Shoppers buy through the ODS at SRP (brochure price). Once they check out, Human Nature Head Office will take care of picking, packing and delivering the order straight to the customer.

Dealers can share the link of their ODS to friends and families abroad. Customers abroad will be charged in Philippine Pesos (Php), so there may be slight differences depending on their credit/debit card charges for foreign currency transactions.

Only those with active Dealer rank may avail an Online Dealer Shop and ODS earnings are only applicable for shoppers – customers purchasing at SRP. An ODS cannot earn from the purchase of another member or dealer since they are already purchasing at a discount, you will earn commissions on their purchases instead (as long as you meet your rank's monthly requirements).

Shoppers can purchase via their choice of Online Shop, so you can earn even from prior registered shoppers even if they are not your referrals. Consequently, your referrals may also purchase from another dealer's ODS.

Dealers may not sell at higher or lower prices than the magalogue prices. Hence, it is the dealer's responsibility to check the prices from the Human Nature website and update their site. Any dealer found selling at the wrong price, whether higher or lower, risks the immediate termination of their dealership and removal of discounts.

The latest official photos of products may be found on the product pages on our website, www.humanheartnature.com/buy. Take advantage of them and download them to use in your online store. Just credit our website!

Dealers should Indicate on their profile photo that they are a Human Nature Dealer - or else people might assume they're also a branch and expect them to provide dealer discounts. For example, use "Human Nature Villa Margarita Dealer" instead of "Human Nature Villa Margarita". The guidelines laid down for dealers are there to help build up their credibility as an authorized Human Nature Reseller.

ADDITIONAL INFORMATION FOR HEARTREPRENEURS/DEALERS

How To Keep Your Human Nature Products in its Best Condition: Product Handling

Our natural products must be stored away from direct sunlight and below 30 degrees centigrade to preserve the quality of the products. Failure to do so will cause irreparable damage to the products such as loss of fragrance, separation or discoloration since the products do not contain chemical stabilizers or emulsifiers. Active ingredients of natural products degrade at a faster rate in high temperature conditions. Natural products are at their best quality when stored in a cool area but not directly stored in front of an air-conditioning unit.

You must never leave the products inside a vehicle or any other place that will subject the products to temperatures greater than 35 degrees Celsius as the liability for any change in the quality of products not properly stored in accordance with these directions will be with the customer.

Since our products do not contain petroleum derived solubilizers, it is important to always shake the products before use to ensure that the ingredients are properly mixed throughout the product. Some ingredients, especially essential oils, tend to settle either at the surface or at the bottom of the product. Shaking is also required for oil-based products that tend to separate due to storage above 35 degrees Celsius to bring it back to its homogeneous form.

When stored in/exposed to low temperatures, some products tend to form streaks or precipitates and in extremely low temperatures solidify. To disperse the streaks, just shake the product. The physical state of the product will revert to its original form once it is stored again in ideal room temperature.

Product bottles and containers should always be properly and tightly capped after each use to prevent contamination as well as to maintain the product scent. Natural fragrances dissipate at a faster rate than synthetic fragrances.

For refilling of bottles, make sure that the bottles are properly cleaned, rinsed and dried, showing no residue of the old content in the bottle. We recommend refilling Human Nature bottles with their original content. Natural ingredients are more sensitive to handling, so proper care is needed to prevent the risk of microbial contamination of the product, which may alter its effectiveness. For safe refilling, we recommend that you bring only empty, clean and completely dry Home Care bottles to our refilling hubs.

Our bar soaps are cold processed, which makes them absorb moisture more, causing them to melt faster. Hence, we recommend that you keep them in a dry soap dish/container after use.

Bottles or containers marked as fragile must be always handled with care. Avoid placing the bottles or containers in places where they can accidentally fall or in spaces where they can bump into other objects and break. Extra care must also be given to powder and makeup products since we do not use synthetic binders.

We strongly advise that you use the products only up to their indicated expiration date. Our guarantee for the quality and effectiveness of our product is only up until the expiry date stamped on each item.

Please consume Social Enterprise food products within the expiration date and follow the storage conditions on the product labels.

Safety Reminders

Natural products are not automatically allergen-free. Some people may have an inherent sensitivity to certain natural ingredients. If you are unsure if you have any allergies to an ingredient that you have not tried before or if you have sensitive skin, we highly recommend that you do a patch test first before you start using the product regularly.

To perform a patch test, please follow the instructions below:

1. Gently cleanse the inner arm area.
2. Apply a small amount of product and rub in a small area, approximately the size of a peso.
3. Cover with a bandage.
4. Do not remove the bandage or wash the area for 24 hours.
5. Then check for any sign of irritation, including redness, swelling or blistering. If any irritation is present, do not use the product.

Natural products are generally safer to use during pregnancy than their chemical counterparts.

However, it will always be your best bet to check with your physician if there are any ingredients that you need to stay away from during pregnancy. Similarly, if you have a skin condition or are under medication, it is important for you to consult your doctor and always **check the label** of the product before using it.

Our Wellness Oils are generally safe for use. Each has a concentration that is within the maximum dermal dose. However, the use of products containing essential oils comes with a precaution for some conditions.

Please refer to the table below:

Wellness Oils	Precautions
Tea Tree Oil	Should not be used on deep wounds or near the eyes, ears, nose or internally.
Eucalyptus Oil	For external use only
Rosemary Oil	Rosemary oil should not be used during pregnancy and is unsuitable for people with epilepsy or high blood pressure.
Citronella Oil	Citronella oil may irritate sensitive skin and cause dermatitis in certain individuals.

Orange Oil	Generally regarded as safe
Lavender Oil	Discontinue use in case of allergic reactions

If you have any of the above conditions or have sensitive skin, please check with your physician before using any product containing essential oils.
